Amendments to Specification

Please make the following amendments to the Specification and disregard the non-compliant amendments suggested to the Examiner on September 15, 2005.:

The paragraph contained on Page 4, lines 26-28 and Page 5, lines 1-4:

The fastener may take any appropriate form. While not limiting the nature of the fastener, it is preferred that the fastener is one of those disclosed or to be disclosed by Telezygology Pty Limited or Telezygology Inc in patent specifications. Reference is made to the following patent specifications, the contents of which are hereby imported by reference: International Patent Application No. PCT/AU99/00185, International Patent Application No. PCT/AU03/00759, International Patent Application No. PCT/AU03/00933 and Australian Provisional Patent Application No. 2003901352. See now PCT/AU2004/000371, PCT/AU2004/001580, nad AU Patent Application 2005901640.

The paragraph contained on Page 7, lines 13-17:

As an another example, the fastener may be a fastener assembly for releaseably securing an element, the element including a post having a groove, the assembly including a bar adapted to engage the groove to secure the element, the assembly also including a connecting means attached to the bar and ~~eonsisting~~ comprising of or including shape memory material which, upon application of suitable energy, is adapted to change shape and draw the bar out of engagement with the groove, thus releasing the element.

The paragraph contained on Page 9, lines 17-24:

The communication may comprise or include a an acknowledgment of deposit of an article in the compartment. For example, the article may be a letter or package carrying a radio frequency identification tag or a bar code, for instance. The identifying indicia may be readable inside the compartment and convey confirmation of receipt to, for example, a central computer run by a courier company, or to a hand-held device of the courier. As another example, the identifying indicia may be read at the time of deposit by swiping it past a reader associated with the compartment and this may be independent of the fastener. Appropriate readers are known and will be apparent to one skilled in the art.
